PROFESSIONAL SUMMARY

MSc Cyber Security graduate from the University of Chester (academic year 2025 - 2026), with a Bachelor of Cyber Security from Air University. Skilled in penetration testing, digital forensics, vulnerability assessment, network security, ICS security, and security-focused research. Practical experience includes an ICS security internship, IDS development for industrial environments, MSc dissertation research on randomness testing, and current e-commerce operations experience managing eBay account activity, campaigns, and product listings.

CORE SKILLS

Cyber Security: Penetration Testing, Vulnerability Assessment, Network Security, Digital Forensics, Incident Response, ICS Security, OSINT, CTF Labs

Tools: Nmap, Metasploit, Burp Suite, Wireshark, Cisco Packet Tracer, Autopsy, FTK Imager, OS Forensics, OpenVAS, Nessus

Programming & Platforms: Python, C/C++, C#, SQL, HTML/CSS, Windows, Kali Linux, Parrot OS, Ubuntu, Virtual Machines

Operations: eBay Account Management, Product Listings, eBay Campaigns, Marketplace Operations

PROFESSIONAL EXPERIENCE

E-commerce Operations / eBay Account Management | Trezlon Ltd

Apr 2025 - Present

- Manage eBay account operations, including product listings, listing updates, and day-to-day marketplace activity.
- Run eBay campaigns to support product visibility, customer reach, and sales performance.
- Prepare marketplace-ready listings with clear titles, descriptions, pricing details, and structured product content.

Cyber Security Intern | Phi-Tech

Jun 2023 - Aug 2023

- Worked as an intern specializing in Industrial Control Systems (ICS) security and industrial cyber risk awareness.
- Supported practical analysis of security risks, vulnerabilities, and defensive controls in industrial environments.

PROJECTS & RESEARCH

MSc Research Dissertation | University of Chester

2025 - 2026

- Developed an integrated randomness testing suite for PRNG/TRNG analysis, statistical testing, vulnerability detection, and security assessment.
- Focused on randomness quality, entropy concerns, weak generator behaviour, and cryptographic reliability.

IDS for Industrial Control Systems | Final Year Project

2023 - 2024

- Designed and tested an IDS concept to protect ICS networks and devices from cyberattacks and unauthorized access.
- Focused on anomaly detection, vulnerability identification, suspicious activity monitoring, and alert generation.

Digital Forensics and Incident Response Labs | Academic Work

2025 - 2026

- Applied forensic investigation concepts, artifact review, and incident response workflow using Autopsy and FTK Imager.

Blood Bank Database System | Semester Project

2022

- Developed a relational database to manage blood donation, donor records, inventory, and distribution information.

EDUCATION

MSc Cyber Security | University of Chester | Graduated

2025 - 2026

Relevant modules: Software Development Techniques, Business Implications of Cybersecurity, Web Systems, Digital Forensics and Incident Response, Penetration Testing and Active Defence, CO7100 - Research Dissertation.

Bachelor of Cyber Security | Air University, Islamabad, Pakistan

2020 - 2024

Relevant coursework: Network Security, Penetration Testing, Information Security, Digital Forensics, Vulnerability Assessment, Reverse Engineering, Cryptography, Operating Systems, Databases, AI, Software Engineering, OOP, Data Structures and Algorithms.

CERTIFICATIONS, AWARDS & ACTIVITIES

- Connect and Protect: Networks and Network Security - Google Coursera
- Assets, Threats, and Vulnerabilities - Google Coursera
- Introduction to Cyber Security Tools & Cyber Attacks - IBM Coursera
- Entrepreneur Gala - 2nd Position, Air University, for presenting the IDS for ICS idea
- IEEE Cyber Warfare & Security Conference - Attendee (2021) and Organizing Committee Member (2022)
